

TIRON

Iron derivatives

► Company Overview

The Tiron Trading Company has been established for more than a decade, relying on its specialized and experienced forces and having equipped with modern equipment and machinery, for the production and processing of Iron derivatives. One of the most important policies of this company is direct access to quality resources and raw materials in accordance with modern standards and providing it at a reasonable price to customers, factories and craftsmen around the world. We are proud to do our best to increase the productivity and customer satisfaction; because we believe that customer satisfaction will be the key to our future success, and the progress together will lead to greater empowerment and value creation for all stakeholders.

► Business Description

Iron is one of the most widely used and strong metals in the world and has many applications in the construction of most structures in the world. The metal is mined from iron ore, which is one of the most abundant rocks on Earth. There are also many iron ore mines in the Middle East, which has made it one of the largest areas for the extraction and processing of iron and its derivatives in the world. Several countries are currently active in this field, among which China is in the first place with the production and processing of more than 50% of the world needs, followed by India, Japan and the United States. The Tiron Company has also been able to meet the needs of large industries, factories and merchants by increasing the quantity and quality of its products by utilizing modern machinery and equipment and by committed experts in the field of Steel Billet production, Steel Slabs, Rebar, Steel Plate, Hot Iron Briquette, Sponge Iron, Hematite Iron Ore, Iron Mill Scale, DRI Sludge, Iron Pellets, etc.

► Vision and Values

The vision of Tiron Trading Company is to become an international model in the field of extraction, processing, production and export of various iron derivatives worldwide.
